## Our partnerships include...

# IIGCC's COP28 priorities are to...

## 1. **HIGHLIGHT** what needs to come next in response to the Global Stocktake and the role of investors

### **Our expertise and experience:**

International policy advocacy, Climate Action 100+, Net Zero Asset Managers initiative, Paris Aligned Asset Owners initiative, Net Zero Investment Framework

## 2. **FURTHER ENHANCE** action on resilience, adaptation and nature

### **Our expertise and experience:**

Climate Resilience Investment Framework, PCRAM, Nature Action 100

## 3. **PROMOTE** the importance of emerging and developing economies (EMDEs) in making progress towards global net zero and climate resilience goals

### **Our expertise and experience:**

ASCOR, Net Zero Investment Framework (Just Transition), Net Zero Engagement Initiative (expansion to EMDEs)

# IIGCC's call to action in support of ambitious COP28 outcomes...

As featured in an open letter from Stephanie Pfeifer, CEO, IIGCC to H.E. Dr. Sultan Ahmed Al Jaber, COP28 President-Designate and UAE Special Envoy for Climate Change to present the investor perspective on climate negotiation.

- 1. Phasing out fossil fuels and speeding up global decarbonisation efforts:** IIGCC calls on all Parties to align their national policies with the shared commitment to achieve the long-term goals of the Paris Agreement, including increasing renewable energy adoption, setting more ambitious energy efficiency targets, and accelerating the transition towards energy systems free of unabated fossil fuels.
- 2. Building resilience and reducing vulnerability:** IIGCC highlights the importance of COP28 achieving significant progress on enhanced adaptation action including by providing clarity on the Paris Agreement's Global Goal on Adaptation.
- 3. Scaling up, accelerating and aligning finance for climate action:** IIGCC calls on COP28 to support reform of the global financial architecture to address finance gaps and derisk projects, as well as to support progress on a New Collective Quantified Goal on Climate Finance to mobilise public and private capital for a net zero and climate-resilient future.

Stephanie Pfeifer, CEO, IIGCC

***“As the need for decisive climate action becomes clearer than ever, it is imperative that COP28 is suitably ambitious and delivers meaningful outcomes to support the global transition to net zero.***

***For the hundreds of investors globally that have already set ambitious net zero commitments as part of their duty to clients and beneficiaries to protect and preserve the long-term financial value of their assets from the physical and transition risks of climate change, they will be watching to see whether COP28 can be a defining moment in delivering a supportive policy environment for net zero.***

***I urge the COP28 President-Designate to do what he can to help make this happen.”***

# About IIGCC

IIGCC brings the investment community together to work towards a net zero and climate resilient future. We create change the world needs by unlocking investor action on climate change.

Our work supports investors in generating returns for clients and beneficiaries, which in turn provides financial wellbeing for future generations. We work with our members to address climate risk and ensure they are well positioned to make the most of investment opportunities offered by climate mitigation and adaptation efforts, ensuring that their investments contribute towards a better world for us all to live in.

Our team supports investors to create practical solutions that can make a real difference in tackling climate change – providing guidance and support on investment practices, policies and corporate behaviours that have real impact and deliver change that the world needs.
